

Captain Fantastic

Present and created by Prestige Book Club

Some Facts about Space

- 1) One million Earths could fit inside the sun – and the sun is considered an average-size star.
- 2) For years it was believed that Earth was the only planet in our solar system with liquid water.
- 3) Comets are leftovers from the creation of our solar system about 4.5 billion years ago – they consist of sand, ice and carbon dioxide.
- 4) You wouldn't be able to walk on Jupiter, Saturn, Uranus or Neptune because they have no solid surface!
- 5) If you could fly a plane to Pluto, the trip would take more than 800 years!

More...

(6) There are more stars in the universe than grains of sand on all the beaches on Earth. That's at least a billion trillion!

7) The sunset on Mars appears blue.

A History about Space Exploration

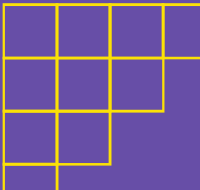

Outer Space

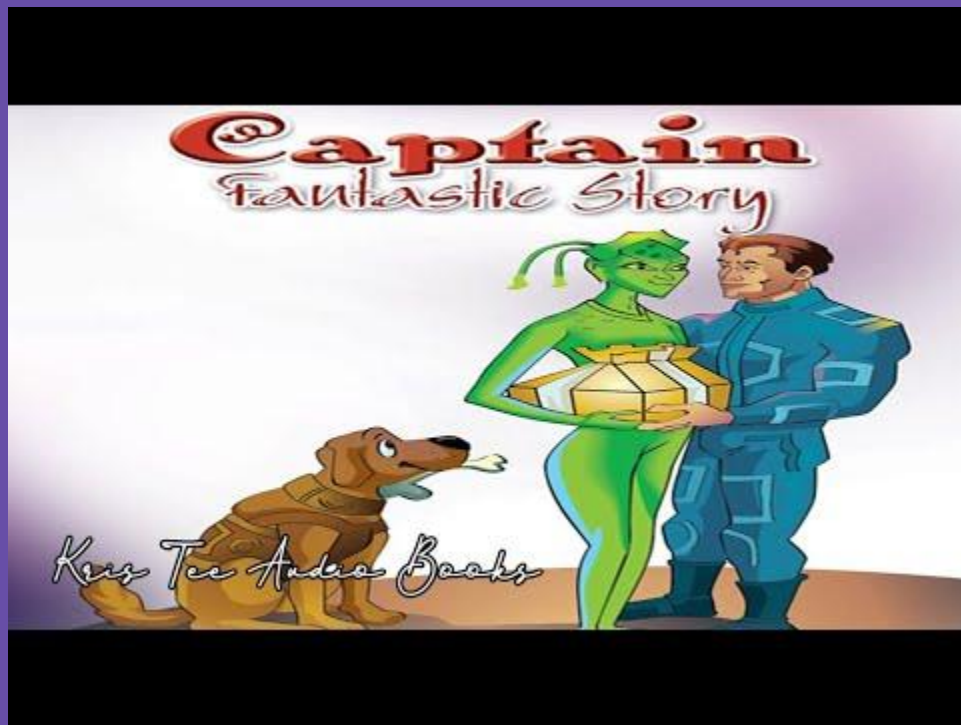

Nemesis (n.)

The definition of a nemesis is an enemy who can't be beaten.
